

Are You Smarter Than a Business Education Student?

A customizable PowerPoint presentation for classroom use

This presentation (compatible with PowerPoint 97-2003 and 2007) is based on FOX Network's "Are You Smarter than a 5th Grader?" The game has been set up for five contestants (students). Each contestant has his/her own slide with dollar amounts linking to that contestant's topics. The topics are then linked to individual slides containing the questions. Directions for modifying the presentation to add questions and answers are included. No special equipment is required.

A service project offered by:

Delta Pi Epsilon
Beta Theta Chapter
UW-Whitewater
2008
